Excellence!

First I hope You have a good success with learning English. There because I hope that I may write You now in English.

From Gloria I have got a letter today in which she wrote, that You will be visited from Father Mullier who before has been with Father Bolduc. Perhaps it is allowed to me to say some words about this matter: Our experience in these things is the following: one must be very carefully. The new man must be proved very well. Wants he to work or wants he only to have a good house to have a good life. Who has ordained him? When he has ordained from Lefebvre he must be re-ordained, because the consecration of the Lefebvre-Consecrator is uncertain. This also is the opinion from Mgr. Guerard des Lauriers. Next point is to prove if he is a spy. - Please, be very carefully we have a lot of very bad experience just with priests!

An other point: The most important thing is, that the bishops must write a new Declaratio about the pastoral leadership in the Church. Before the imperfect council is going on the faithful and the priests and also the bishops must build an unity, provisorially. That there are now 8 bishops is one step. The other must be to reunite the faithful to the Church with a new Pope. And on step in this direction would be the pastoral leadership of all bishops together, only provisorially. If there will happens nothing the faithful in the whole world have no real help. There we will have then new schismen, new sectes and so one.

Also it is very important that the bishops always write something about our situation to show the people the way which is to go. That is the duty of the Epi-scopus. - Please, don't be angry, that I am telling You things You know much better, but our work must go on. We are only laymen without authority, You have it, and that makes the difference.

Please, pray for us, my children, my wife, my work and give us please Your episcopal blessing! We are doing all what we can and we also will pray for Your difficult work.

Your E. Heller
